EXPERIENCE

Planning Assistant Intern | DICT Capiz

January – March 2025

- Built and launched a responsive, accessible company website aligned with branding goals
- Automated digital certificate distribution and managed accurate trainee records in the database
- Designed training materials and branded visual content for internal and public use
- Maintained and validated trainee data to support verification and reporting processes
- Provided technical support during trainings to ensure smooth delivery
- Deployed and configured software across devices to optimize productivity and creativity

PROJECTS

SWIFFO – Online Manpower Service Reservation Platform

Full-stack Web Application | March 2025

- Developed a web-based platform for booking manpower services with real-time scheduling, messaging, and online payment integration.
- Built secure role-based access for users, workers, and admins with encrypted data and hashed credentials.
- Implemented job posting, auto-assignment based on worker ratings, and real-time booking workflows.
- Integrated real-time chat with image sharing, secure online payments, and feedback/review system.
- Enabled worker profiles with portfolios, certifications, and experience highlights.
- Added admin features for report generation, database management, and system notifications.

Moss – Social Media Application

Full-stack Mobile Application | June 2025

- Developed a social media platform, enabling real-time feed, messaging, notifications, and user profile.
- Implemented anonymous note sharing and user management features to foster engagement.
- Built the backend API using Node.js, Express.js, and MongoDB for scalable data handling.
- Used React Native with Expo for cross-platform mobile development and seamless user experience.

CERTIFICATES

Artificial Intelligence (Universitas Pembangunan Nasional “Veteran” Yogyakarta)

March 2024

- Gained hands-on experience with machine learning algorithms, including supervised and unsupervised learning techniques.
- Explored AI concepts such as neural networks, natural language processing, and intelligent decision-making systems

Software Development and Design Thinking (DICT – Capiz)

March 2025

- Applied SDLC to build and test functional software solutions.
- Used design thinking to prototype and improve user-centered designs.

Web Content Management using WordPress (DICT – Capiz)

June 2025

- Learned to design, build, and manage responsive websites using WordPress themes, plugins, and customizations.
- Gained practical skills in content publishing, SEO optimization, and website maintenance through the WordPress dashboard.
